

(Rule-03-2)
WASATCH COUNTY HEALTH DEPARTMENT
RULE GOVERNING DEPARTMENT FEES

Citizens of the County, the general public, County employees and officers, and other persons regularly request or receive services which results in costs to the Health Department. It is appropriate, reasonable and lawful under the Local Health Department Act, (26A-1-114 (i) UCA) for the Health Department to assess and collect fees and charges from those people requesting or receiving services from the Health Department.

The Wasatch County Board of Health has adopted rules and regulations authorizing and setting fees to be charged by the department for services provided by the department. It is the philosophy of the Board that tax revenue should be used to help defray the cost of providing services which benefit the entire county. For revenue producing activities, those benefiting should pay for the actual cost of providing service. Fees will be set at adequate levels to ensure proper administration of department duties. Costs will be tracked and fees will be adjusted annually, as necessary, on a cost plus basis. The Board of Health has reviewed the current fee schedule and finds that it is reasonable in light of the aforementioned guiding philosophy.

If any provisions of the Health Department rules or regulations heretofore adopted are inconsistent with the provisions of this rule, they are hereby repealed and superseded by this rule.

Pursuant to the U.C.A. 26A-1-114 et. seq., Wasatch County Ordinances, and Department Rules, the Wasatch County Board of Health hereby adopts the following amended fees for services and products provided to the public to take effect January 1, 2023.
